

INTERIOR PANELS HDF/BALSA

CHARACTERISTICS

- ✓ High strength and stiffness-to-weight ratio, making each panel strong yet lightweight, while having good fatigue resistance
- ✓ Environmentally friendly solution
- ✓ High impact strength, withstanding sudden impacts or shocks
- ✓ Average density of the HDF sandwich is 290 to 310 kg/m³, making each panel lightweight
- ✓ Our Balsa end grain core has an average density of 150 kg/m³, contributing to the lightweight nature of the panels
- ✓ Tolerance: -0.2mm / +0.4mm
- ✓ D3 PVAC white wood glue

PANEL DIMENSIONS

- ✓ 3000 x 1200 mm
- ✓ 2600 x 1200 mm
- ✓ 2800 x 1200 mm

FACE PANELS

- ✓ HDF
- ✓ Thickness: 5 mm
- ✓ Surface: lacquered or unlacquered
- ✓ Glue: D3 bonding

USES

- ✓ Table tops
- ✓ Furniture
